

Overview

The FiberPlex brand has been engineering, manufacturing and delivering secure fiber solutions to the Intelligence Communities, DOD, US Dept of State and other Federal Agencies for more than a quarter of a century and share that expertise with commercial and international markets. With nearly 30 years in the industry, the FiberPlex brand has been established as a leader in TEMPEST technology and **secure communications** including both **Information Assurance (IA)** and **SIGINT** applications. All of the world's most critical intelligence and military data is transported through our equipment in global deployments. All FiberPlex products are designed and built in the USA, listed on many critical lists and hold vital certifications such as **TEMPEST** and **TSG**.

Products

- Fiber Optic Modem / Isolators supporting
 - Serial Data (EIA530, RS422, RS232, V.35, etc)
 - Telecom (POTS, ISDN, T1/E1, T3/E3, STS1, E&M, Avaya, etc)
 - Control and Alarm
 - Video (RS170, 3G-SDI, HDMI, etc)
 - Audio
 - TEMPEST
- Waveguide Filters for SCIF and Shielded Enclosure penetrations
- Active and Passive Wave Division Multiplexers
- Multichannel Audio Transport over Fiber

Applications

- SATCOM
- Telecommunications
- SCIF
- Information Assurance
- C4ISR
- SCADA
- Physical Security

Past Performance (partial)

SPAWAR - Provides secure SATCOM fiber interface for Navy Multiband Terminal (NMT) to support both land based and ship board communications

US Air Force – Provided a custom fiber solution to support secure communications for a fleet of prototype mobile command centers through MIT Lincoln Labs

US Department of State – Provided decades of support for secure communications requirements for US Embassies all over the globe

NSA – Provides secure telecom and serial conversion for communications in SCIF environments

US Department of State – Designed a custom solution for the remote and secure operation of RO Tactical Radios over the Iridium network

CAGE: 0EJ5B

DUNS: 183906957

GSA: GS-35F-334DA

NAICS

334290 Other Communications Equipment Manufacturing

334310 Audio and Video Equipment Manufacturing

334210 Telephone Apparatus Manufacturing

334220 Radio and Television Broadcasting and Wireless

335314 Relay and Industrial Control Manufacturing

332710 Machine Shops

335921 Fiber Optic Cable Manufacturing

541712 Electronic research and development laboratories or services

PSC Codes

5895 Miscellaneous Communication Equipment

5810 Communications Security Equipment and Components

5836 Video Recording and Reproducing Equipment

5805 Telephone and Telegraph Equipment

5995 Cable, Cord, and Wire Assemblies: Communication Equipment

5820 Radio And Television Communication Equipment, Except Airborne

5830 Intercommunication and Public Address Systems, Except Airborne

Partial Client List

SPAWAR • US Dept of State • US Navy • US Customs and Border Patrol • NSA • FAA • NSWC NAVSEA • US Air Force • SAIC • SERCO • GDIT • NIEF • Lockheed Martin

Value Added Resellers

Crystal Clear Technologies • Impres Technology Solutions • Mercom Corp • Norseman Defense Technologies • Northern Technologies Group • Systems Plus

Partial List of Contracts Supported

Through VARs

GSA Schedule 70 • SEWP V • SeaPort-e • NITAAC
 CIO-CS • DOJ ITSSS
